Were you able to complete test case 1 without any issues?

5 responses

If not, why?

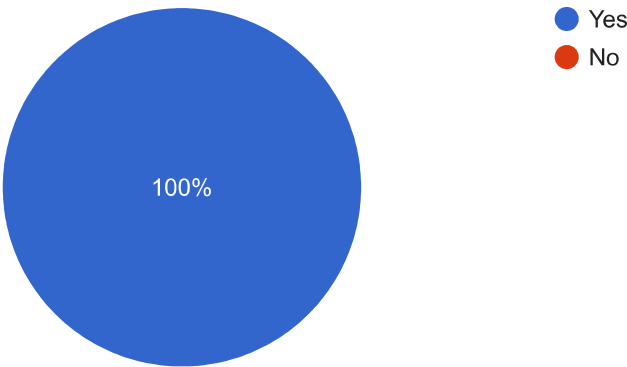

1 response

I was registered but the app took too long to tell me that I was registered, it was slow.

Was everything readable?

 Copy

5 responses

If your answer was no, please explain.

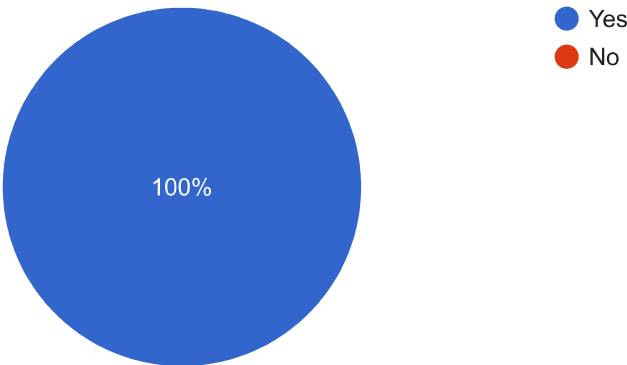

1 response

The colours made it hard to read the text on screen, it was too bright.

Was the app responsive?

What are your thoughts on the apps current features?

5 responses

I think it is a very interesting concept for an app, I've used an app like this before. I liked that the products were divided up by store.

I like them. The app has a lot of potential

They're nice and simple, I can claim codes easily.

I like it, I can view the stores, discounted products and my profile, it's simple, I don't feel confused using it.

The colours go well and I like the fact that there were a few of my favorite shops to choose from

Is there anything you would change?

5 responses

Not at the moment

I would add the ability to edit my account

Maybe the colours, it was hard to read with glasses on.

Maybe the colours of the app. On my phone it became blurry and too bright.

Nope

Additional comments

3 responses

I liked the theme colours

NA

I would be very happy if this app was brought to the Google play store one day.
